

## 700 Series –anti vibration pads for excellent damping

AirLoc anti vibration pads of the 700 series are the result of 50 years of development and application experience in vibration isolation engineering. Thanks to the **high level of damping**, the reduction of vibration levels is extremely effective, even when used in critical application conditions. Very good resistance to oils, lubricants and fuels makes the 700 series anti vibration pads ideal for modern, cost-effective production machines and machine tools.
