AirLoc Wedgmount® Precision Levelers VRKC - bolt-through, centric, spherical seat

Centrally bolt-through AirLoc Wedgmount® Precision Levelers with spherical seat and the Compact system, the spring tensioning of top and bottom part. The right choice for machines with varying loads, offset center of gravity, or high dynamic forces. The Wedgmount® Precision Leveler is permanently anchored to the machine and floor and still offers highly effective vibration and shock isolation . For machine supports that are rough or for uneven floors, the spherical seat version guarantees a level connection to a incline of up to 3°.

	Type	Art. no.	Max. load [lbs]	Length L [mm]	Width B [mm]	Height H [mm]	Bottom pad
